

“We were blown away by his progress in such a short time!”

“You really did deliver on the promise to make it fun!”

“The personalized attention was great given the group atmosphere.”

“The camp seems to go at individual speeds and talents.”

— *parents of recent campers*

Recent research shows **THERE ARE REAL BENEFITS TO HAVING SMOOTH, SPONTANEOUS HANDWRITING** when it comes to overall learning, organization, creativity, self-confidence and more.

The Kids Center **SPRING BREAK & SUMMER HANDWRITING CAMPS CAN HELP IDENTIFY AND REMOVE THE BARRIERS TO YOUR CHILD’S BEST PERFORMANCE** while giving you the tools and resources to set your child on a successful learning path!

SPACE IS LIMITED!

Register TODAY to ensure your child will have the best possible chance at academic success!

Registration Form and payment must be received before your child's space will be reserved. Deadline is 2 weeks prior to camp.

Crab Grabbers

Designed for children ages 4-5 years old, **Crab Grabbers** addresses foundation skills needed for good penmanship. The focus will be hand and fine motor development, shape and directional line concepts, and basic strokes that are the building blocks for writing in kindergarten as well as the early primary grades. This group of children are often currently practicing with single letters or basic words. All children this age would enjoy the fun multisensory approach to activities. Participants should be able to communicate, follow directions in a small group setting, and need to be able to work both independently as well as with others. A Fine Motor Take Home Kit is provided on the last day allowing families to easily practice similar hand development activities, long after the camp is finished.

Tuesday, April 3 thru Friday, April 6
9:00 am—11:00 am

PLEASE NOTE: both camps will be held at Kids Center's CENTRAL Campus at 982 Eastern Parkway

Print Wizards

Print Wizards is intended for children in the early primary grades who need help fine-tuning their penmanship skills using manuscript. Children in this group are often currently practicing with writing at a phrase, sentence, or small paragraph level. A complete review of letter sequences within writing lines will remediate common difficulties such as spacing and legibility errors, poor letter formation, and letter reversals. Small motor development activities will promote successful pencil grasp and motion when writing. We will use a multisensory approach to make handwriting FUN! Participants should be able to communicate, follow directions in a small group setting, and need to be able to work both independently as well as with others. Upon admission to the group, parents will be asked to complete a short questionnaire plus guide their child through a handwriting sample at home to help identify areas of concern.

Tuesday, April 3 thru Friday, April 6
12:30 pm—2:30 pm

"I love the tips and advice on things to try"

— parent of a *Print Wizards* participant
